## Schematic iphone 7 plus pdf

We'll send you a picture of the schema figure via email once payment is made. Warning: This diagram can only be used as a repair guide, we do not pay a response for any illegal use. 7 Plus boardview does not have a referral designer. A type that is not worth without it. Not perfect, but enough to find components, thank you, very clean, and can be searched confirmed. LCD Screen Grade ConditionDescriptionLCDClassFlex CableFrameAppearance IntactnessAftermarket BasicChina LCDJKAftermarketAftermarketNewAftermarket StandardFlex Cable ReplacementOriginalAftermarketOriginAfterMarketNewOriginal PullsPull From Used DevicesOriginalOriginoriginoriginalNew AlikeOriginalOriginal Equipment Manufacturing EquipmentOriginalOriginalNew At the Union Repair store, we grade our iPhone screen into 5 different types of quality based on various materials installed Next are full details of each condition. After Market Foundation it received a replacement of the original section, which maintains the correct balance between price and quality. It has a sustainable supply chain in China, and all screen components are copy quality. Usually, LCD screens are from a number of different factories, the 4 most popular in the Chinese market are JK,AUO, LongTeng, and ShenChao. By comparing the brightness and sponsorship of LCD, we found JK is the best quality among them and the second best is AUO. No doubt, the other components on the screen are all copied. After Market Standards It is better than After Market Foundation causes it to come with original lampooned flex and LCD panels. Other components such as touch panels, frames (not pressed), background lights, polarization lenses, and OCA are all copies of different factories. After the Market Selected Core Components (such as LCD and flexes) are the original 100% pulled from second-hand iPhones while frames and copy touch panels. Touch panels and frames come along with cold-pressed glue and are fitted along with LCD by capable third-party factories that maintain excellent quality. Pulls Origin No doubt, it tears up from used iPhones with all 100% original parts and works perfectly just like the original new screen, it has whatever the original new screen is. The only complaint about this quality is that some displays are with 1 or 2 scratches but are still welcomed by our critical customers who need good quality. Original New It is 100% original from Apple's authorized factories like Toshiba, Sharp, and LG. We get screens like this from first-tier traders. The touch panel is a coated oleophobic that prevents from fingerprinting when using your iPhone. And start with an iPhone 7g, backlight from the factories different ones come with different codes. The backlight from Sharp has code starting with a DKHCCON, from Toshiba starting with A C11JF7C7FZQ, from LG starting with DTFPC3F. Welcome to the GSM-Forum forum.
